Nathan Lawrence  
CEO, Heyrex Systems  
236-256 Karori Rd  
Karori  
Wellington 6012

Dear Nathan,

Heyrex monitors have been used at the Massey University Veterinary Teaching Hospital for several research projects, including assessment of osteoarthritis in the working dog, and evaluating the effects of nutritional quality on working ability.

We hope to continue to use the new generation collars on similar projects that require continual assessment of dog mobility in the coming years.

Yours sincerely

Jonathan Bray  
Associate Professor, Companion Animal Clinical Studies  
Massey University Veterinary Teaching Hospital
