Why use TORUS™?

Pets need plenty of fresh, clean water every day to remain healthy. As pet carers, it is our responsibility to ensure their needs are met.

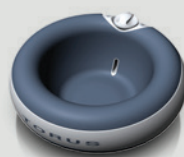

Conventional water bowls often contain only a limited amount of water which can be further reduced by evaporation or spills. These problems decrease the water available and can lead to your pet being denied its daily drinking needs.

TORUS™ (Latin for 'hollow circular ring') is the solution. Water stored inside the walls ensures an ample supply of water, protected from dust and contaminants. The low profile also means no spills.

TORUS™ is a go-anywhere bowl. The valve position, when locked, secures stored water inside the walls so you can take TORUS™ with you wherever you go.

The benefits of TORUS™

- Auto-replenishes
- Large water capacity
- Travel friendly
- Stored water protection
- Sizes to suit all pets
- Made from food-grade materials
- Filters water
- Water fill, flow and lock options
- No mess, no spills
